ReShape Lifesciences Inc.

Notes to Condensed Consolidated Financial Statements

(dollars in thousands, except per share amounts; unaudited)

(1) Basis of Presentation

The accompanying interim condensed consolidated financial statements and related disclosures of Reshape Lifesciences Inc. (the "Company") have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission ("SEC") and should be read in conjunction with the consolidated financial statements and notes included in the Company's Annual Report on Form 10-K for the year ended December 31, 2018. Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles in the United States of America ("GAAP") have been condensed or omitted.

In the opinion of management, the interim consolidated condensed financial statements reflect all adjustments considered necessary for a fair statement of the interim periods. All such adjustments are of a normal, recurring nature. The results of operations for the interim periods are not necessarily indicative of the results of operations to be expected for the full year.

Fair Value of Financial Instruments

The carrying amounts of cash equivalents, accounts receivable, accounts payable and certain accrued and other liabilities approximate fair value due to their short-term maturities. Refer to Note 5 regarding the fair value of debt instruments.

Net Loss Per Share

The following table sets forth the potential shares of common stock that are not included in the calculation of diluted net loss per share because to do so would be anti-dilutive as of the end of each period presented:

	March 31	l,
	2019	2018
Stock options outstanding	4,206	1,634
Common shares underlying subordinated convertible debentures	11,827,957	_
Common shares underlying convertible preferred stock	131,743	5,797
Warrants to purchase common stock	15,304,721	6,811

Recent Accounting Pronouncements

New accounting standards adopted by the Company in 2019 are discussed below or in the related notes, where appropriate.

In February 2016, the Financial Accounting Standards Board ("FASB") issued ASU No. 2016-02 *Leases (Topic 842)* that amended the guidance on leases. The amendment improves transparency and comparability among companies by recognizing lease assets and lease liabilities on the balance sheet and by disclosing key information about leasing arrangements. The guidance was effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. Reporting entities could elect to adjust comparative periods and record the cumulative effect adjustment at the beginning of the earliest comparative period, or to not adjust comparative periods and record the cumulative effect adjustment at the effective date.

The Company adopted the new guidance as of the effective date of January 1, 2019 using the modified retrospective approach with no adjustments to the comparative period presented in the financial statements. In addition, the Company elected the package of practical expedients permitted under the transition guidance to not reassess (1) whether any expired or existing contracts are, or contain, leases, (2) the lease classification for expired or existing leases, and (3) initial direct costs for existing leases.

The adoption of the guidance resulted in the recognition of right-of-use ("ROU") assets and lease liabilities for operating leases of \$1,176 as of January 1, 2019. The guidance did not have an impact on the Company's Condensed Consolidated Statements of Operations or Cash Flows. See Note 6 for disclosures related to the Company's leases.

In June 2018, the FASB issued ASU No. 2018-07, *Compensation – Stock Compensation (Topic 718)*, *Improvements to Nonemployee Share-Based Payment Accounting*, which is intended to simplify the accounting for nonemployee share-based payment transactions by expanding the scope of Topic 718 to include share-based payment transactions for acquiring goods and services from nonemployees. The guidance was effective for fiscal years and interim periods within those years beginning after December 15, 2018, with early adoption permitted. The Company adopted this guidance effective January 1, 2019. The adoption of this guidance had no effect on the Company's consolidated financial statements as there were no share-based payment transactions with nonemployees in 2018 and such transactions in prior years, all of which had an established measurement date, were not material.

New accounting standards not yet adopted are discussed below.

In August 2018, the FASB issued ASU No. 2018-13, *Fair Value Measurement (Topic 820) – Disclosure Framework – Changes to the Disclosure Requirements for Fair Value Measurement*, which modifies the disclosure requirements on fair value measurements and is intended to improve the effectiveness of disclosures, including the consideration of costs and benefits. The guidance is effective for the fiscal years and interim periods within those years beginning after January 1, 2020. Early adoption is permitted, and an entity is permitted to early adopt any removed or modified disclosures and delay adoption of additional disclosures until their effective date. The Company is evaluating the effects of ASU 2018-13 on its consolidated financial statements.

In August 2018, the FASB issued ASU 2018-15, *Intangibles-Goodwill and Other-Internal-Use Software (Subtopic 350-40): Customer's Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement That Is a Service Contract.* The amendments in this update align the requirements for capitalizing implementation costs incurred in a hosting arrangement that is a service contract with the requirements for capitalizing implementation costs incurred to develop or obtain internal-use software (and hosting arrangements that include an internal-use software license). The ASU is effective for the Company on January 1, 2020. Early adoption of the ASU is permitted. The Company is evaluating the effects of ASU 2018-15 on its consolidated financial statements.

(2) Liquidity and Management's Plans

The accompanying condensed consolidated financial statements have been prepared assuming the Company will continue as a going concern. The Company currently is not generating revenue from operations that is significant relative to its level of operating expenses, and does not anticipate generating revenue sufficient to offset operating costs in the short-term to mid-term. The Company's history of operating losses, limited cash resources and lack of certainty regarding obtaining significant third-party reimbursement for its products, raise substantial doubt about its ability to continue as a going concern. As of March 31, 2019, the Company had \$1,828 of cash and cash equivalents.

The Company's anticipated operations include plans to (i) continue to integrate the sales and operations of the Company with the Lap-Band product line acquired in December 2018; (ii) continue development of the ReShape Vest, (iii) seek opportunities to leverage the Company's intellectual property portfolio and custom development services to provide third party sales and licensing opportunities, and (iv) explore and capitalize on synergistic opportunities to expand our portfolio and offer future minimally invasive treatments and therapies in the obesity continuum of care. The Company believes that it has the flexibility to manage the growth of its expenditures and operations depending on the amount of available cash flows, which could include reducing expenditures for marketing, clinical and product development activities. However, the Company will ultimately need to achieve sufficient revenues from product sales and obtain additional equity or debt financing to support its operations.

Management is currently pursuing various funding options, including seeking additional equity or debt financing as well as a strategic merger or other transaction to obtain additional funding to support the expansion of Lap-Band product sales and to continue the development of, and to successfully commercialize, the ReShape Vest. While the acquisition of the Lap-Band product line does provide incremental revenues to the Company, the cost to support the European clinical trial of the ReShape Vest is expected to exceed revenues for the foreseeable future. While there can be no assurance that the Company will be successful in its efforts, the Company has a long history of raising equity

financing to fund its development activities. Should the Company be unable to obtain adequate financing in the near term, the Company's business, result of operations, liquidity and financial condition would be materially and negatively affected, and the Company would be unable to continue as a going concern. Additionally, there can be no assurance that, assuming the Company is able to strengthen its cash position, it will achieve sufficient revenue or profitable operations to continue as a going concern.

(3) Discontinued Operations

During the fourth quarter of 2018, the Company sold substantially all of the assets exclusively related to its ReShape Balloon product line, which consisted of inventory, property and equipment and the related intellectual property underlying the intangible assets. The operating results of the ReShape Balloon product line have been reflected as discontinued operations in the Condensed Consolidated Financial Statements. In addition, the cash flows associated with discontinued operations are presented separately in the accompanying Condensed Consolidated Statements of Cash Flows.

There were no assets associated with the ReShape Balloon product line at March 31, 2019 and December 31, 2018. The components of loss from discontinued operations for the three months ended March 31, 2018 consisted of the following:

	Three Months Ended March 31, 2018
Total revenue	\$ 811
Loss from discontinued operations before income taxes	(3,856)
Income tax benefit	
Loss from discontinued operations, net of tax	\$ (3,856)

(4) Supplemental Balance Sheet Information

Components of selected captions in the condensed consolidated balance sheets consisted of the following:

Accounts and other receivables, net:

	Ma	arch 31,	December 31,		
		2019	2018		
Accounts receivable	\$	233	\$	510	
Receivables, Apollo		3,686		407	
Total accounts and other receivables	\$	3,919	\$	917	

Prepaid expenses and other current assets:

	M	arch 31,	Dec	ember 31,	
		2019	2018		
Prepaid contract research organization expenses	\$	1,627	\$	1,064	
Prepaid insurance		659		58	
Other current assets		174		147	
Total prepaid expenses and other current assets	\$	2,460	\$	1,269	

Accounts payable and accrued liabilities:

	M	March 31, 2019		ember 31, 2018
Accounts payable	\$	2,622	\$	1,558
Payables, Apollo		1,266		69
Professional service related expenses		2,561		3,095
Payroll related expenses		685		1,146
Other accrued liabilities		420		588
Total accounts payable and accrued liabilities	\$	7,554	\$	6,456

In connection with the Company's December 2018 acquisition of the Lap-Band product line from Apollo Endosurgery, Inc. ("Apollo"), the Company entered into transition services, supply and distribution agreements with Apollo. The receivables from, and payables to, Apollo are primarily related to services performed by Apollo under these agreements. For a period of up to six months, Apollo takes and fills the Company's Lap-Band product orders and collects invoices for such orders on the Company's behalf. In addition, for a period of up to 24 months, Apollo issues purchase orders and procures certain accessory Lap-Band products from third-party suppliers on the Company's behalf. Remittances from and to Apollo are subject to a reconciliation of the credits/charges for services performed under the agreements.

(5) Debt

Asset Purchase Consideration Payable

The asset purchase consideration payable related to the Company's December 2018 acquisition of the Lap-Band product line from Apollo was initially recorded at net present value using a discount rate of 5.1%. The asset purchase consideration payable is secured by a first security interest in substantially all of the Company's assets. At March 31, 2019, the aggregate carrying value of the current and noncurrent asset purchase consideration payable of \$6,393, as adjusted for accretion of interest, and due to the first security interest held by Apollo, approximates fair value.

Convertible Subordinated Debentures

On March 29, 2019, the Company completed a private placement with certain healthcare focused institutional investors for the sale of secured subordinated original issue discount convertible debentures ("debentures") for a purchase price of \$2,000. The debentures are due June 28, 2019 and have a face amount of \$2,200, reflecting a 10% original issue discount. At any time after June 28, 2019, if the debentures have not been repaid, subject to certain investor ownership limitations, the debentures will be convertible into shares of common stock at a conversion price equal to the lesser of \$0.33 and 80% of the average of the lowest two volume weighted average prices of the Company's common stock during the 20 trading days prior to conversion.

The Company analyzed the conversion features embedded in the debentures and determined that bifurcation and liability classification was required under ASC 815 due to the variable number of shares issuable upon conversion. The fair value of the bifurcated embedded conversion features was determined to be \$481 as of the issuance date using a Monte Carlo model and primarily Level 3 inputs and was recorded as additional debt discount and an embedded derivative liability. As the Company did not elect the fair value option for the debentures, the initial carrying amount of the debentures, net of discounts and deferred financing costs of \$1,483, will be accreted to the face amount over the term to maturity. The embedded derivative liability will be recorded at fair value at each reporting date.

As collateral for the Company's obligations under the debentures, the Company has granted the debenture holders a security interest in all of the assets of the Company and its subsidiary, which is subordinated to the Company's obligation to Apollo for the remaining asset purchase consideration. In connection with the financing, the Company amended the exercise price of warrants to purchase up to 8 million shares of common stock held by the investors that were issued on November 28, 2018 from \$1.50 per share to \$0.01 per share. The value attributable to the exercise price reduction of \$130 was recorded in Warrant Expense and was estimated using the Black Scholes option pricing model

using a risk-free interest rate of 2.2%, an expected term of 4.7 years, expected dividends of zero and expected volatility of 204.4%.

(6) Leases

On the date of adoption of Topic 842, the Company had noncancelable operating leases for office and warehouse space in San Clemente, California and noncancelable operating leases for certain office equipment that expire at various dates through 2022. The Company does not have any short-term leases or financing lease arrangements and there have been no lease modifications. Certain of the Company's equipment leases include variable lease payments that are adjusted periodically based on actual usage. Lease and non-lease components are accounted for separately.

Operating lease costs for the three months ended March 31, 2019 were \$120. Variable lease costs were not material for the three months ended March 31, 2019.

Supplemental information related to operating leases was as follows:

Balance Sheet Information at March 31, 2019	
Operating lease ROU assets	\$ 1,070
Operating lease liabilities, current portion	\$ 374
Operating lease liabilities, long-term portion	 700
Total operating lease liabilities	\$ 1,074
Cash Flow Information for the Three Months Ended March 31, 2019	
Cash paid for amounts included in the measurement of operating leases liabilities	\$ 116

Maturities of operating lease liabilities at March 31, 2019 were as follows:

Twelve months ending March 31,		
2020	\$	419
2021		328
2022		333
2023		83
Total lease payments	_	1,163
Less: imputed interest		89
Total lease liabilities	\$	1,074
Weighted-average remaining lease term at end of period (in years)		3.0
Weighted-average discount rate at end of period		5.1 %

Disclosures related to periods prior to adopting the new lease guidance

Future minimum lease commitments under noncancelable operating leases as of December 31, 2018 were as follows:

Year ending December 31,	
2019	 449
2020	332
2021	331
2022	166
Total	\$ 1,278

(7) Equity

February 2019 Conversion of Common Stock into New Series of Convertible Preferred Stock

On February 1, 2019, pursuant to an exchange agreement with Sabby Volatility Warrant Master Fund, Ltd. ("Sabby") 1,192,000 shares of the Company's common stock were exchanged for an aggregate of 1,192,000 shares of series E convertible preferred stock, par value \$0.01 per share ("Series E Preferred Stock") in a noncash transaction. Each share of Series E Preferred Stock was convertible into one share of common stock at Sabby's election. In April 2019, all shares of Series E Preferred Stock were converted into an equal number of shares of common stock.

Conversion of Series B Convertible Preferred Stock into Common Stock

During the three months ended March 31, 2019, 156 shares of Series B convertible preferred stock ("Series B Preferred Stock") were converted into 124,800 shares of common stock. At March 31, 2019, the remaining 3 shares of Series B Preferred stock are convertible into 2,400 shares of common stock.

(8) Revenue Disaggregation and Operating Segments

The following table presents the Company's revenue disaggregated by product and geography:

	Three Months Ended March 31, 2019				Three Months Ended March 31, 2018						
		U.S.		OUS *	Total		U.S.		OUS		Total
Lap-Band product	\$	3,066	\$	8	\$ 3,074	\$		\$		\$	_
ReShape vBloc product							139				139
Total	\$	3,066	\$	8	\$ 3,074	\$	139	\$		\$	139

^{*}All revenues outside the United States for the three months ended March 31, 2019 were in Canada.

As described in Note 4 of the Company's Consolidated Financial Statements included in its Annual Report on Form 10-K for the year ended December 31, 2018, the Company acquired the Lap-Band product line in December 2018. As a result of the acquisition of the Lap-Band product line, the Company is longer actively marketing the ReShape vBloc product.

Operating Segments

As described in Note 2 of the Company's Consolidated Financial Statements included in its Annual Report on Form 10-K for the year ended December 31, 2018, the Company's operating segments consist of the Lap-Band segment, the ReShape Vest segment and the ReShape vBloc segment. These operating segments are reported based on the financial information provided to the Chief Operating Decision Maker (the Chief Executive Officer, or "CODM").

The Company's CODM evaluates segment performance based on gross profit. Gross profit for the Lap-Band segment was \$2,231 and \$0 for the three months ended March 31, 2019 and 2018, respectively. Gross profit for the ReShape vBloc product was \$0 and \$79, the three months ended March 31, 2019 and 2018, respectively. There were no revenues or gross profit recorded for the ReShape Vest operating segment for the three months ended March 31, 2019 and 2018 because the ReShape Vest is still in the development stage. The Company's CODM does not use operating segment assets information to allocate resources or to assess performance of the operating segments and thus total segment assets have not been disclosed.

(9) Income Taxes

No income tax expense or benefit was recorded for the three months ended March 31, 2019 due to the valuation allowance on deferred tax assets. The income tax benefit of \$1,382 recorded for the three months ended March 31, 2018 reflects the tax impact of the net operating loss in the period which have an indefinite carryover period. A portion of

these net operating losses were supported by expected taxable income from the reversal of indefinite life intangibles, such that they are more likely than not to be realized.

(10) Stock-based Compensation

Stock-based compensation expense related to stock options issued under the ReShape Lifesciences Inc. Second Amended and Restated 2003 Stock Incentive Plan (the "Plan") and as inducement grants for the three months ended March 31, 2019 and 2018 was as follows:

		Three Months Ended March 31,			
		2019		2018	
Selling, general and administrative		\$	1,223	\$	682
Research and development			33		58
Total	·	\$	1,256	\$	740

As of March 31, 2019, there was approximately \$5,103 of total unrecognized compensation costs related to unvested stock option awards, which are expected to be recognized over a weighted-average period of 2.5 years.

There were no stock options granted or exercised during the three months ended March 31, 2019 and 2018.

(11) Commitments and Contingencies

Clinical Trials

The Company has ongoing commitments under the pre-approval ReCharge and post-approval ReNew clinical trials related to its ReShape vBloc product which are expected to be completed in 2019 and 2022, respectively. The Company is required to pay for patient follow up visits only to the extent they occur. In the event a patient does not attend a follow up visit, the Company has no financial obligation. The Company is also required to pay for explants or revisions, including potential conversions of ReCharge control devices to active devices, should a patient request or be required to have one during the course of the clinical trials. The Company has no financial obligation unless an explant, revision or conversion is requested or required. The Company recognizes expense when incurred with respect to these clinical trials.

Litigation

Fulfillium. On April 20, 2017, Fulfillium, Inc. filed a complaint against ReShape Medical, Inc. (which the Company acquired in October 2017 and which is now a wholly owned subsidiary of the Company) in the U.S. District Court for the District of Delaware, which alleged misappropriation of trade secrets and infringement of two U.S. Patents ("Fulfillium I"). On July 28, 2017, ReShape Medical moved to dismiss both the trade secret claim and certain aspects of the patent infringement claim, and to transfer the litigation to the U.S. District Court for the Central District of California. On October 16, 2017, the Court granted ReShape Medical's motion to dismiss the trade secret and willful infringement claims, and ordered the case transferred to the U.S. District Court for the Central District of California. Fulfillium twice amended its complaint, narrowing its original trade secret claim and adding further patent infringement claims and additional parties. On June 4, 2018, ReShape Medical filed a motion to dismiss the patent infringement claims for lack of standing, which the Court granted on July 5, 2018. On August 10, 2018, the Court dismissed without prejudice the trade secret claim for lack of subject matter jurisdiction and terminated the case. Fulfillium has appealed these dismissals and ReShape Medical has appealed the grant and denial of certain attorney fee awards. On July 20, 2018, Fulfillium filed a new complaint against ReShape Lifesciences, Inc. (and its wholly owned subsidiary ReShape Medical LLC) in the U.S. District Court for the Central District of California ("Fulfillium II") reasserting the patent infringement claims asserted in Fulfillium I. On August 15, 2018, Fulfillium amended its complaint in Fulfillium II to reassert the trade secret misappropriation claim asserted in Fulfillium I against ReShape Medical LLC and others. On September 7, 2018, Fulfillium filed a complaint in California state court alleging the same trade secret misappropriation claim asserted in both Fulfillium I and Fulfillium II. On November 7, 2018, the Court dismissed the non-Company parties from Fulfillium II. On April 20, 2018, ReShape Medical filed Inter Partes Review ("IPR") petitions with the Patent Trial and Appeal Board of the U.S. Patent and Trademark Office (the "PTAB") to have all claims of both of the originally asserted Fulfillium patents canceled as unpatentable over various combinations of prior art. On November 6,

2018, the PTAB denied those petitions. The parties held a mediation on April 9, 2019, but were unable to resolve the matter. The Company intends to continue to vigorously defend itself against Fulfillium's claims. We currently are unable to estimate the losses or range of loss for these two matters.

Alpha and Iroquois. On July 12, 2018, Alpha Capital Anstalt ("Alpha") filed a complaint against the Company in the U.S. District Court for the Southern District of New York. In August 2017, Alpha acquired shares of the Company's series B convertible preferred stock and warrants to purchase shares of the Company's common stock in an underwritten public offering. Pursuant to the terms of the series B convertible preferred stock and warrants, the conversion price of the series B convertible preferred stock and exercise price of the warrants was subject to adjustment in the case of, among other things, dilutive issuances of securities by the Company. The complaint alleges breach of contract, claiming that the Company should have adjusted the conversion price of the series B convertible preferred stock and exercise price of the warrants to not less than \$420.00 per share, rather than the \$1,575.00 per share to which the Company actually adjusted such conversion price and exercise price, in connection with its registered direct offering of series D convertible preferred stock and warrants to purchase common stock that it completed and announced in April 2018. Alpha seeks declaratory relief, damages of not less than approximately \$3.6 million (less the proceeds of actual sales of the Company's common stock made by Alpha) and attorneys' fees. The Company believes the claims alleged are without merit and intends to vigorously protect and defend itself. However, we are currently unable to estimate a loss or range of loss for this matter.

On July 26, 2018, Iroquois Capital Investment Group, LLC and Iroquois Master Fund, Ltd. filed a complaint against the Company in the U.S. District Court for the Southern District of New York, with substantially the same claims and seeking substantially the same relief as Alpha's complaint described above, except that Iroquois claims that the conversion price of the series D convertible preferred stock and exercise price of the warrants should have been adjusted to \$189.00 per share, and Iroquois is claiming damages estimated to exceed \$5 million. The Company believes the claims alleged are without merit and intends to vigorously protect and defend itself. However, we are currently unable to estimate a loss or range of loss for this matter.

Except as disclosed in the foregoing paragraphs, the Company is not currently a party to any litigation and the Company is not aware of any pending or threatened litigation against it that is reasonably possible to have a material adverse effect on the Company's business, operating results or financial condition. The medical device industry in which the Company operates is characterized by frequent claims and litigation, including claims regarding patent and other intellectual property rights as well as improper hiring practices. As a result, the Company may be involved in various legal proceedings from time to time.

Product Liability Claims

The Company is exposed to product liability claims that are inherent in the testing, production, marketing and sale of medical devices. Management believes any losses that may occur from these matters are adequately covered by insurance, and the ultimate outcome of these matters will not have a material effect on the Company's financial position or results of operations. The Company is not currently a party to any product liability litigation and is not aware of any pending or threatened product liability litigation that is reasonably possible to have a material adverse effect on the Company's business, operating results or financial condition.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion should be read in conjunction with the condensed consolidated financial statements and notes thereto appearing elsewhere in this Quarterly Report on Form 10-Q.

Except for the historical information contained herein, the matters discussed in this "Management's Discussion and Analysis of Financial Condition and Results of Operations," are forward-looking statements that involve risks and uncertainties. In some cases, these statements may be identified by terminology such as "may," "will," "should," "expects," "could," "intends," "might," "plans," "anticipates," "believes," "estimates," "predicts," "potential," or "continue," or the negative of such terms and other comparable terminology. These statements involve known and unknown risks and uncertainties that may cause our results, level of activity, performance or achievements to be materially different from those expressed or implied by the forward-looking statements. Factors that may cause or contribute to such differences include, among others, those discussed in the "Risk Factors" section included in Item 1A of our Annual Report on Form 10-K filed on May 16, 2019.

Except as may be required by law, we undertake no obligation to update any forward-looking statement to reflect events after the date of this report.

Overview

We are a developer of minimally invasive medical devices that advance bariatric surgery to treat obesity and metabolic diseases. Our current portfolio includes the LAP-BAND® Adjustable Gastric Banding System and the ReShape $Vest^{TM}$, an investigational device, to help treat more patients with obesity.

Financial Overview

Results of Operations – Continuing Operations

Revenue. Revenue for the three months ended March 31, 2019 of \$3.1 million consisted of sales of our Lap-Band product which we acquired in December 2018. For the three months ended March 31, 2018, revenue was comprised of \$0.1 million of sales of our ReShape vBloc product. Following our acquisition of the Lap-Band product line in December 2018, we are no longer actively marketing the ReShape vBloc product. There has been no revenue recorded for the ReShape Vest as the product is still in the development stage.

Gross profit. Gross profit was \$2.2 million for the three months ended March 31, 2019 compared to \$0.1 million for the three months ended March 31, 2018. Gross profit in the first quarter of 2019 reflects cost of sales associated with the established Lap-Band product line, as compared with cost of sales for the ReShape vBloc product in the first quarter of 2018.

Selling, General and Administrative Expenses. Selling, general and administrative expenses decreased \$0.9 million to \$5.4 million during three months ended March 31, 2019 from \$6.3 million for the three months ended March 31 2018. The decrease was primarily due to a provision of \$1.0 million recorded in the first quarter of 2018 to write down excess ReShape vBloc inventory components.

Research and Development Expenses. Research and development expenses were \$1.1 million for the three months ended March 31, 2019 compared with \$2.5 million for the three months ended March 31, 2018. The higher level of expenses in the prior year period were due to \$0.7 million of expenses related to the 49 ReShape vBloc units implanted during the period for the ReShape vBloc Now program and \$0.7 million in professional fees related to other product development activities, primarily the ReShape Vest.

Warrants Expense. Warrant expense of \$0.1 million for the three months ended March 31, 2019 is primarily related to the change in fair value of certain warrants held by certain institutional investors for which the exercise price was reduced in connection with the sale of convertible subordinated debentures to those investors.

Net Interest Expense. We had noncash interest expense of \$0.1 million for the three months ended March 31, 2019, which consisted of \$0.08 million of accretion of interest expense on the net present value of the asset purchase

consideration payable for our acquisition of the Lap-Band product line and \$0.02 million of accretion of discount on the convertible subordinated debentures issued in March 2019.

Income tax benefit. No income tax expense or benefit was recorded for the three months ended March 31, 2019 due to the net operating loss. The income tax benefit of \$1.4 million recorded for the three months ended March 31, 2018 reflects the tax impact of the net operating loss in the period which have an indefinite carryover period. A portion of these net operating losses were supported by expected taxable income from the reversal of indefinite-lived intangibles, such that they are more likely than not to be realized.

Results of Operations – Discontinued Operations

Loss from discontinued operations for the three months ended March 31, 2018 of \$3.9 million reflects the activities of our Reshape Balloon product line, which we sold in December 2018 in connection with our acquisition of the Lap-Band product line assets. There was no income tax expense or benefit for discontinued operations.

Liquidity and Capital Resources

As of March 31, 2018, we had \$1.8 million of cash and cash equivalents to fund operations. We have financed our operations to date principally through the sale of equity securities and debt financing. Our anticipated operations include plans to (i) continue to integrate the sales and operations of the Company with the newly acquired Lap-Band product line in order to expand sales domestically and internationally as well as to obtain cost savings synergies, (ii) continue development of the ReShape Vest, (iii) seek opportunities to leverage our intellectual property portfolio and custom development services to provide third party sales and licensing opportunities, and (iv) explore and capitalize on synergistic opportunities to expand our portfolio and offer future minimally invasive treatments and therapies in the obesity continuum of care. The Company believes that it has the flexibility to manage the growth of its expenditures and operations depending on the amount of available cash flows, which could include reducing expenditures for marketing, clinical and product development activities. However, the Company will ultimately need to achieve sufficient revenues from product sales and obtain additional debt or equity financing to support its operations.

Management is currently pursuing various funding options, including seeking additional equity or debt financing as well as a strategic merger or other transaction to obtain additional funding to support the expansion of Lap-Band product sales and to continue the development of, and to successfully commercialize, the ReShape Vest. While the acquisition of Lap-Band product line does provide incremental revenues to the Company, the cost to support the European clinical trial of the ReShape Vest is expected to exceed revenues for the foreseeable future. While there can be no assurance that the Company will be successful in its efforts, the Company has a long history of raising equity financing to fund its development activities. Should the Company be unable to obtain adequate financing in the near term, the Company's business, result of operations, liquidity and financial condition would be materially and negatively affected, and the Company would be unable to continue as a going concern. Additionally, there can be no assurance that, assuming the Company is able to strengthen its cash position, it will achieve sufficient revenue or profitable operations to continue as a going concern.

Net Cash Used in Operating Activities - Continuing Operations

Net cash used in operating activities from continuing operations was \$5.7 million and \$6.2 million for the three months ended March 31, 2019 and 2018, respectively. Net cash used in operating activities from continuing operations was primarily the result of the loss from continuing operations in each year net of noncash items and changes in operating assets and liabilities.

Net Cash Provided by Financing Activities from Continuing Operations

Net cash provided by financing activities of \$2.0 million for the three months ended March 31, 2019 was related to the cash we received in connection with the issuance of convertible subordinated debentures, net of original issuance discount and issuance costs. The debentures are due June 28, 2019 and have a face amount of \$2.2 million, reflecting a 10% original issue discount. At any time after June 28, 2019, if the debentures have not been repaid, subject to certain investor ownership limitations, the debentures will be convertible into shares of common stock at a conversion price equal to the lesser of \$0.33 and 80% of the average of the lowest two volume weighted average prices of the Company's

common stock during the 20 trading days prior to conversion. Refer to Note 5 of Condensed Consolidated Financial Statements for additional information about the debentures.

Discontinued Operations

Net cash used in operating activities of discontinued operations of \$3.1 million for the three months ended March 31, 2018, reflects activities of the ReShape Balloon product line. There were no investing or financing activities related to discontinued operations for the three months ended March 31, 2018.

Operating Capital and Capital Expenditure Requirements

Our anticipated operations include plans to (i) integrate the sales and operations of the Company with the newly acquired Lap-Band product line; (ii) continue development of the ReShape Vest, (iii) seek opportunities to leverage the Company's intellectual property portfolio and custom development services to provide third party sales and licensing opportunities, and (iv) explore and capitalize on synergistic opportunities to expand our portfolio and offer future minimally invasive treatments and therapies in the obesity continuum of care. The Company believes that it has the flexibility to manage the growth of its expenditures and operations depending on the amount of available cash flows, which could include reducing expenditures for marketing, clinical and product development activities. However, the Company will ultimately need to achieve sufficient revenues from product sales and obtain additional equity or debt financing to support its operations.

Obtaining funds through the sale of additional equity and debt securities or the warrant holders' exercise of outstanding common stock warrants may result in dilution to our stockholders. If we raise additional funds through the issuance of debt securities, these securities could have rights senior to those of our common stock and could contain covenants that would restrict our operations. The sale of additional equity may require us to obtain approval from our stockholders to increase the number of shares of common stock we have authorized under our certificate of incorporation. We may require additional capital beyond our currently forecasted amounts. Any such required additional capital may not be available on reasonable terms, if at all. If we are unable to obtain additional financing, we may be required to reduce the scope of, delay, or eliminate some or all of, our planned research, development and commercialization activities, which could materially harm our business. In addition, if we raise additional funds through collaboration, licensing or other similar arrangements, it may be necessary to relinquish valuable rights to products or proprietary technologies, or grant licenses on terms that are not favorable.

Our forecast of the period of time through which our financial resources will be adequate to support our operations, the costs to complete development of products and the cost to commercialize our products are forward-looking statements and involve risks and uncertainties, and actual results could vary materially and negatively as a result of a number of factors, including the factors discussed in Part I, Item 1A, *Risk Factors*, of our Annual Report on Form 10-K. We have based these estimates on assumptions that may prove to be wrong, and we could utilize our available capital resources sooner than we currently expect.

The Company's acquisition of the Lap-Band product line provides incremental revenues and does not require further product development. In order to continue the development of, and to successfully commercialize the ReShape Vest, the Company's management is currently pursuing various funding options, including seeking additional equity or debt financing as well as a strategic merger or other transaction to obtain additional funding. The Company has a long history of raising equity financing to fund its development activities; however, there can be no assurance that the Company will continue to be successful in its efforts. Should the Company be unable to obtain adequate financing in the near term, the Company's business, result of operations, liquidity and financial condition would be materially and negatively affected, and the Company would be unable to continue as a going concern. Additionally, there can be no assurance that, assuming the Company is able to strengthen its cash position, it will achieve sufficient revenue or profitable operations to continue as a going concern. The consolidated financial statements do not include any adjustments that might be necessary if the Company is unable to continue as a going concern.

Because of the numerous risks and uncertainties associated with the development of medical devices, such as our ReShape Vest, we are unable to estimate the exact amounts of capital outlays and operating expenditures necessary to complete the development of the ReShape Vest or other additional products and successfully deliver a commercial

product to the market. Our future capital requirements will depend on many factors, including, but not limited to, the following:

- the cost and timing of establishing sales, marketing and distribution capabilities;
- the cost of establishing clinical and commercial supplies of our ReShape Vest and any products that we may develop;
- the rate of market acceptance of our ReShape Vest and any other product candidates;
- the cost of filing and prosecuting patent applications and defending and enforcing our patent and other intellectual property rights;
- the cost of defending, in litigation or otherwise, any claims that we infringe third-party patent or other intellectual property rights;
- the effect of competing products and market developments;
- · the cost of explanting clinical devices;
- the terms and timing of any collaborative, licensing or other arrangements that we may establish;
- · any revenue generated by sales of our Lap-Band, ReShape Vest or our future products;
- the scope, rate of progress, results and cost of our clinical trials and other research and development activities;
- the cost and timing of obtaining any further required regulatory approvals; and
- the extent to which we invest in products and technologies, although we currently have no commitments or agreements relating to any of these types of transactions.

Critical Accounting Policies and Estimates

We prepare our consolidated financial statements in accordance with accounting principles generally accepted in the United States. In doing so, we have to make estimates and assumptions that affect our reported amounts of assets, liabilities and expenses, as well as related disclosure of contingent assets and liabilities. In many cases, we could reasonably have used different accounting policies and estimates. In some cases, changes in the accounting estimates are reasonably likely to occur from period to period. Accordingly, actual results could differ materially from our estimates. To the extent that there are material differences between these estimates and actual results, our financial condition or results of operations will be affected. We base our estimates on past experiences and other assumptions that we believe are reasonable under the circumstances, and we evaluate these estimates on an ongoing basis.

During the three months ended March 31, 2019 there were no material changes to our significant accounting policies which are fully described in Note 2 to our consolidated financial statements included in our Annual Report on Form 10-K for the year ended December 31, 2018.

Off-Balance Sheet Arrangements

As of March 31, 2019, we did not have any off-balance sheet arrangements.

Recent Accounting Pronouncements

See Note 1 to our Condensed Consolidated Financial statements for a discussion of recent accounting pronouncements.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act), defines the term "disclosure controls and procedures" as those controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and that such information is accumulated and communicated to the company's management, including its principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

Based on their evaluation as of March 31, 2019, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) were not effective as of March 31, 2019 for the reasons described below:

Management has determined that the Company has not maintained adequate accounting resources with a sufficient understanding of accounting principles generally accepted in the United States of America ("GAAP") to allow the Company to identify and properly account for new complex transactions. Management has determined that this represents a material weakness in the Company's internal control over financial reporting. As a result of this material weakness, management has identified the following additional material weakness in the Company's internal control over financial reporting:

• The Company did not design and implement internal controls around research and development expenses paid to a Contract Resource Organization ("CRO"). This material weakness resulted in the Company not identifying that certain research and development expenses paid to the CRO in connection with the clinical trial of the ReShape Vest are required to be capitalized under GAAP and recognized into expense as the value of the capitalized asset is realized.

Notwithstanding the material weaknesses in our internal control over financial reporting, we have concluded that the consolidated financial statements and other financial information included in our annual and quarterly filings fairly present in all material respects our financial condition, results of operations and cash flows as of, and for, the periods presented.

Material Weaknesses Remediation Activities

To remediate the material weaknesses in our internal control over financial reporting described above, we established transactional level controls to evaluate and monitor the accounting treatment for research and development-related costs. Remediation efforts relating to the adequacy of accounting resources with a sufficient understanding of GAAP are in process, which involve a re-evaluation of our overall staffing levels within the accounting department, evaluating the extent to which additional resources are required and what qualifications such resources must possess, and attracting and hiring those resources. We also plan to re-evaluate the trainings and ongoing professional education that is provided to, and required of, our accounting personnel. Once these processes have been in operation for a sufficient period of time for our management to conclude that the material weaknesses have been fully remediated and our internal controls over financial reporting are effective, we will consider these material weaknesses fully addressed.

Changes in Internal Control Over Financial Reporting

There were no changes in our internal control over financial reporting other than as it pertains to our efforts to remediate material weaknesses (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the quarter ended March 31, 2019 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

Fulfillium. On April 20, 2017, Fulfillium, Inc. filed a complaint against ReShape Medical, Inc. (which the Company acquired in October 2017 and which is now a wholly owned subsidiary of the Company) in the U.S. District Court for the District of Delaware, which alleged misappropriation of trade secrets and infringement of two U.S. Patents ("Fulfillium I"). On July 28, 2017, ReShape Medical moved to dismiss both the trade secret claim and certain aspects of the patent infringement claim, and to transfer the litigation to the U.S. District Court for the Central District of California. On October 16, 2017, the Court granted ReShape Medical's motion to dismiss the trade secret and willful infringement claims, and ordered the case transferred to the U.S. District Court for the Central District of California. Fulfillium twice amended its complaint, narrowing its original trade secret claim and adding further patent infringement claims and additional parties. On June 4, 2018, ReShape Medical filed a motion to dismiss the patent infringement claims for lack of standing, which the Court granted on July 5, 2018. On August 10, 2018, the Court dismissed without prejudice the trade secret claim for lack of subject matter jurisdiction and terminated the case. Fulfillium has appealed these dismissals and ReShape Medical has appealed the grant and denial of certain attorney fee awards. On July 20, 2018, Fulfillium filed a new complaint against ReShape Lifesciences, Inc. (and its wholly owned subsidiary ReShape Medical LLC) in the U.S. District Court for the Central District of California ("Fulfillium II") reasserting the patent infringement claims asserted in Fulfillium I. On August 15, 2018, Fulfillium amended its complaint in Fulfillium II to reassert the trade secret misappropriation claim asserted in Fulfillium I against ReShape Medical LLC and others. On September 7, 2018, Fulfillium filed a complaint in California state court alleging the same trade secret misappropriation claim asserted in both Fulfillium I and Fulfillium II. On November 7, 2018, the Court dismissed the non-Company parties from Fulfillium II. On April 20, 2018, ReShape Medical filed Inter Partes Review ("IPR") petitions with the Patent Trial and Appeal Board of the U.S. Patent and Trademark Office (the "PTAB") to have all claims of both of the originally asserted Fulfillium patents canceled as unpatentable over various combinations of prior art. On November 6, 2018, the PTAB denied those petitions. The parties held a mediation on April 9, 2019, but were unable to resolve the matter. The Company intends to continue to vigorously defend itself against Fulfillium's claims. We currently are unable to estimate the losses or range of loss for these two matters.

Alpha and Iroquois. On July 12, 2018, Alpha Capital Anstalt ("Alpha") filed a complaint against the Company in the U.S. District Court for the Southern District of New York. In August 2017, Alpha acquired shares of the Company's series B convertible preferred stock and warrants to purchase shares of the Company's common stock in an underwritten public offering. Pursuant to the terms of the series B convertible preferred stock and warrants, the conversion price of the series B convertible preferred stock and exercise price of the warrants was subject to adjustment in the case of, among other things, dilutive issuances of securities by the Company. The complaint alleges breach of contract, claiming that the Company should have adjusted the conversion price of the series B convertible preferred stock and exercise price of the warrants to not less than \$420.00 per share, rather than the \$1,575.00 per share to which the Company actually adjusted such conversion price and exercise price, in connection with its registered direct offering of series D convertible preferred stock and warrants to purchase common stock that it completed and announced in April 2018. Alpha seeks declaratory relief, damages of not less than approximately \$3.6 million (less the proceeds of actual sales of the Company's common stock made by Alpha) and attorneys' fees. The Company believes the claims alleged are without merit and intends to vigorously protect and defend itself. However, we are currently unable to estimate a loss or range of loss for this matter.

On July 26, 2018, Iroquois Capital Investment Group, LLC and Iroquois Master Fund, Ltd. filed a complaint against the Company in the U.S. District Court for the Southern District of New York, with substantially the same claims and seeking substantially the same relief as Alpha's complaint described above, except that Iroquois claims that the conversion price of the series D convertible preferred stock and exercise price of the warrants should have been adjusted to \$189.00 per share, and Iroquois is claiming damages estimated to exceed \$5 million. The Company believes the claims alleged are without merit and intends to vigorously protect and defend itself. However, we are currently unable to estimate a loss or range of loss for this matter.

Except as disclosed in the foregoing paragraphs, the Company is not currently a party to any litigation and the Company is not aware of any pending or threatened litigation against it that is reasonably possible to have a material adverse effect on the Company's business, operating results or financial condition. The medical device industry in which the Company operates is characterized by frequent claims and litigation, including claims regarding patent and other intellectual property rights as well as improper hiring practices. As a result, the Company may be involved in various

legal proceedings from time to time. Except as disclosed in the foregoing paragraphs, the Company is not currently a party to any litigation and the Company is not aware of any pending or threatened litigation against it that could have a material adverse effect on the Company's business, operating results or financial condition. The medical device industry in which the Company operates is characterized by frequent claims and litigation, including claims regarding patent and other intellectual property rights as well as improper hiring practices. As a result, the Company may be involved in various legal proceedings from time to time.

ITEM 1A. RISK FACTORS

There have been no material changes to the risk factors set forth in Item 1.A Risk Factors of our 2018 Annual Report on Form 10-K filed on May 16, 2019.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Unregistered Sales of Equity Securities

None.

Uses of Proceeds from Sale of Registered Securities

None.

Purchases of Equity Securities

None.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

ITEM 5. OTHER INFORMATION

None.

ITEM 6. EXHIBITS

Exhibit No.	Description
10.1	Retention bonus agreement, dated April 12, 2019, by and between ReShape Lifesciences Inc. and Scott P. Youngstrom (incorporated by reference to Exhibit 10.1 to the Company's Current Report on Form 8-K filed with the Securities and Exchange Commission on April 17, 2019).
31.1**	Certification of Chief Executive Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
31.2**	Certification of Chief Financial Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
32.1**	Certification of Chief Executive Officer pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
32.2**	Certification of Chief Financial Officer pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
101**	Financial statements from the Quarterly Report on Form 10-Q of the Company for the quarter ended March 31, 2019, formatted in Extensible Business Reporting Language: (i) the Condensed Consolidated Balance Sheets, (ii) the Condensed Consolidated Statements of Operations, (iii) the Condensed Consolidated Statements of Comprehensive Loss, (iv) the Condensed Consolidated Statements of Cash Flows and (v) the Notes to Condensed Consolidated Financial Statements.

** Filed herewith.

SIGNATURES

Pursuant to the requirements of Section 13 or 15(d) of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

RESHAPE LIFESCIENCES INC.
